LIVE FINOFIN / EQUITY INTELLIGENCE

Finofin

[YOUR EDGE IN EVERY MARKET]

AI-driven equity research. From a single ticker to a complete, real-time analysis.

MURAD SHAH

Senior Project · Instructor: Dr. Pramod Gupta · University of the Pacific

2026

Equity research is broken for everyone but the pros.

3+

Platforms

Bloomberg, Yahoo Finance, SEC filings, fragmented across sources.

$24K

Per Year

Bloomberg Terminal cost, putting institutional tools out of reach.

Hours

Per Stock

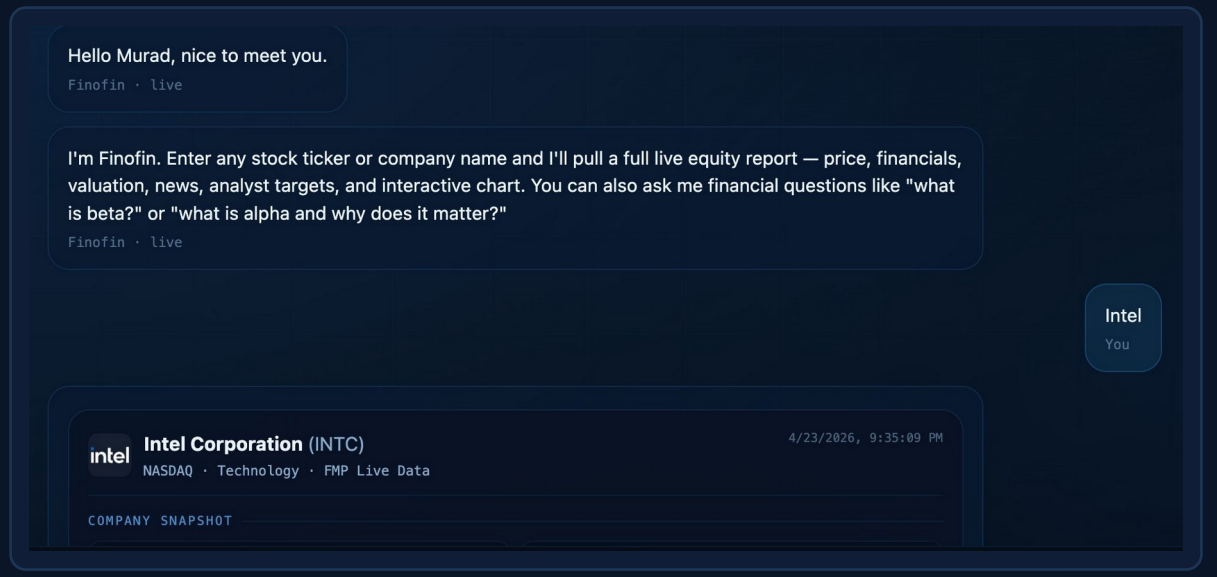

Manual time spent stitching data, news, and ratios into one view.

Retail investors are flying blind, while institutions have everything in one place.

One ticker in. A complete equity report out.

Finofin is a centralized financial intelligence platform that combines live market data with AI reasoning to deliver Bloomberg-style insights instantly.

- **$** **Live Financials**
  Price, market cap, ratios, statements, analyst targets
- **~** **Charts & Trends**
  Interactive TradingView charts and momentum signals
- **@** **Conversational AI**
  Ask 'what is beta?' or 'what is alpha?' inside the app
- **#** **Risk & Valuation**
  Volatility, beta, intrinsic value, long-term outlook

LIVE PRODUCT / finofin.net

8,000+

equities supported
via live ticker search

Every report is institutional-grade.

Type a ticker. In under 3 seconds, Finofin compiles a complete view of any public security.

INTEL CORPORATION · INTC · LIVE EXAMPLE

WHAT'S INCLUDED

- **Company Snapshot**
  Sector, industry, HQ, CEO, IPO date, employees
- **Market Performance**
  Price, daily change, market cap, volume, 52W range
- **Live Price Chart**
  Interactive TradingView with 1m to daily intervals
- **Valuation Ratios**
  P/E, ROE, debt-to-equity, beta, volatility
- **Analyst Targets**
  Consensus targets and recommendations
- **Recent News**
  Top 5 most recent ticker-specific stories

Live data, live charts, live insight.

REAL EXAMPLE

Intel Corp.

INTC · NASDAQ

$66.78

+1.51 (+2.31%)

Vol: 154.52M

Pulled and rendered in real time the moment you type the ticker.

From idea to working product.

1

Input

Live ticker search with smart name-to-ticker matching

2

Aggregate

Parallel calls to FMP for profile, quote, ratios, news, history

3

Reason

LLM + quantitative logic process the data into insights

4

Render

Bloomberg-style report served to a clean, dark UI

BUILT WITH

Node.js + Express · backend & API gateway
Financial Modeling Prep API · live market data
TradingView Widgets · interactive charts
LLM Integration · conversational financial Q&A
HTML / CSS / JS · custom dark UI

WHAT I LEARNED

- **Full-stack engineering**
  Designing APIs, handling async data, building a real product end-to-end.
- **Financial modeling**
  How real valuation, risk, and ratio analysis actually work.
- **AI as a financial tool**
  Where LLMs add value and where quantitative logic must lead.

From research tool to quantitative engine.

Today: a Bloomberg-style report on demand. / Tomorrow: a full quantitative model that predicts.

QUANTITATIVE MODEL

Predict, don't just report

Scale Finofin into a full quantitative engine that analyzes every dimension of a ticker and the broader market to generate data-driven predictions.

FORECASTING

3 to 5-year outlook

Multi-year projections, terminal values, scenario analysis, and macro assumptions baked into every report.

PORTFOLIO INTELLIGENCE

Beyond a single stock

Expand from individual securities to full portfolio risk, factor exposures, Sharpe ratios, and rebalancing signals.

REAL-TIME ALERTS

Always-on monitoring

Push notifications for material moves, earnings surprises, sector rotation, and AI-flagged anomalies.

People are talking.

Early users from finance, trading, and the industry weighing in.

Finance Student, UOP · Student Investment Fund

Finofin would be a valuable resource for analyzing sector-specific stocks and securities. For new members, it provides a clear overview of relevant stocks, making it a helpful tool comparable to Yahoo Finance.

💬 12 🔁 38 ❤️ 247

Sahila ✅
@sahila.bbg

Senior Equity Specialist, Bloomberg

Pleasantly surprised at the user-friendly design, access, and accuracy. I'd compare Finofin to Bitcoin 15 years ago. You can choose to ignore it, but in the coming years you'll feel the same guilt of not looking into it sooner.

💬 67 🔁 284 ❤️ 1.2K

Thank you.
